

# FEND Nanodegree Learning Plan

Continue your learning of responsive web design. Then, learn to write READMEs using Markdown. Documentation is an important part of the development process, after all!

## Week 2

Time (hours)	Activity	Notes
1	Complete <a href="#">Starting Small</a> lesson	Use the best practices in responsive design to start building from the smallest devices (mobile phones) up to the largest displays (desktop computers).
1	Complete <a href="#">Building Up</a> lesson	Use media queries to define breakpoints in your application to easily split your site into different versions based on display size.
4	Complete <a href="#">Common Responsive Patterns</a> lesson	Walk through the most popular responsive layout patterns and learn the tools needed to implement them in your own designs.
2	Complete <a href="#">Optimizations</a> lesson	Learn how to optimize images, tables, and fonts to make for the best responsive layouts.
2	Complete <a href="#">Writing READMEs</a> lesson	Begin creating effective documentation for your applications by writing README files to help other developers use and read your code.
---	Submit <a href="#">Build a Portfolio Site</a> project	Project is due on Sunday.
